JUAN ROGELIO MAYNARD

Front End Developer

ABOUT ME

I'm a junior frontend programmer with a passion for programming and a focus on Vue.js and JavaScript. Although I have no work experience in this field, I have worked on several personal projects where I have applied my programming and web design skills. I have always liked to be updated, so I am informed daily about new technologies. I am excited to have the opportunity to apply for a position as a Junior Front End Developer at your company and am looking forward to putting my skills to use and learning more.

EDUCATION

Programming Courses

Instituto Amemt - Front-End Web Developer - Online courses 6 months based on practices and real projects - Knowledge in Html, Css, Sass, Bootstrap, JavaScript, Vue and Git

Plan 111 Mil - Título de Analista del Conocimiento - Face-to-face courses + 600 hours based on practices and real projects - Knowledge in Java and MySql

Secondary studies

Escuela Media N° 8 - Multimedia Communication Technician Degree

PERSONAL PROJECTS

AMEMT Final Project

It is an application made with Vuex where I only allow to see the main page, if the User registers (Firebase) will be able to navigate to the different pages to see more information detailed and you can also add, edit, delete and filter a table that contains a list of programming languages. - [See project](#)

Gifs and Stickers search engine

It is an application made with Vue Composition Api where I use GIPHY to make a search and show gifs or stickers depending on which route the user is on. - [See project](#)

Digital Currency Market

It is an application made with Vue where I use an API to show the price of 100 types of virtual currencies in real time. - [See project](#)

Weather Forecast

It is an application made with Vue vite where I use an API to display in Detail the weather according to the region that the user enters. - [See project](#)

QR Code Generator

It is an application made with Vue Vite Composition Api where I use Firebase so that the user enter and generate your QR code. - [See project](#)

Pokemon Finder

It is an application made with Vue where I use PokéAPI for the user to search in a pokemon list and an image and a bar graph are displayed with your detailed information. - [See project](#)

WORK EXPERIENCES

Grido Helado y Lacteos Luz Azul - Responsible for unloading and moving the boxes from the storage place to place of destination. Guarantee the integrity of the cargo throughout the download process and collaborate with other team members to complete the task in a term certain. I demonstrate a high level of commitment and perseverance to ensure that meet customer expectations.
