JUAN MAYNARD

Front-End Developer

ABOUT ME

Hello! I like to create web applications, my area of knowledge is focused on the use of Vue, but I can adapt to any framework without problems. I've been deepening my professional skills for 1 year creating personal projects, in which I've reinforced different topics and tools. I've always liked to be up-to-date, so I'm learning about new technologies on a daily basis.

EDUCACATION

Programming Courses

Instituto Amemt - Front-End Web Developer - Online courses 6 months based on practices and real projects - Knowledge in Html, Css, JavaScript, Git and Vue

Plan 111 Mil - Knowledge Analyst Title - Face-to-face courses + 600 hours based on practices and real projects - Knowledge in Java and MySql

Secondary Studies

Escuela Media N° 8 - Diploma in Multimedia Communication Technician

PERSONAL PROJECTS

AMEMT Final Project

It is an application made with Vuex where I only allow to see the main page, if the user registers (Firebase) he will be able to navigate to the different pages to see more detailed information and he will also be able to add, edit, delete and filter a table that contains a list of programming languages. - [See project](#)

Finder of Gifs and Stickers

It is an application made with Vue Composition Api where I use GIPHY to do a search and show the gifs or stickers according to which route the user is on. - [See project](#)

Digital Currency Market

It is an application made with Vue where I use an API to show the price of 100 types of virtual currencies in real time. - [See project](#)

Weather forecast

It is an application made Html, Css and JavaScript where I use an Api to show in detail the weather according to the region entered by the user. - [See project](#)

WORK EXPERIENCES

Grido Helado and Lacteos Luz Azul - Responsible for unloading merchandise and distributing them to their respective locations.
