JUAN ROGELIO MAYNARD

Front End Developer

ABOUT ME

I'm a junior frontend programmer with a passion for programming and a focus on Vue.js and JavaScript. Although I have no work experience in this field, I have worked on several personal projects where I have applied my programming and web design skills. I have always liked to be updated, so I am informed daily about new technologies. I am excited to have the opportunity to apply for a position as a Junior Front End Developer at your company and am looking forward to putting my skills to use and learning more.

EDUCATION

Programming Courses

Instituto Amemt - Front-End Web Developer - 6-month online courses based on real practices and projects. Extensive experience in web development using HTML, CSS, Sass, Bootstrap and JavaScript. Familiar with Git version control and the Vue framework to create interactive and dynamic interfaces.

Plan 111 Mil - Titulo de Analista del Conocimiento - Face-to-face courses of more than 600 hours, focused on practices and real projects. Extensive experience in development with Java and MySQL, creating robust and efficient solutions for managing data and applications.

Secondary studies

Escuela Media N° 8 - Multimedia Communication Technician Degree

PERSONAL PROJECTS

AMEMT Final Project

A Vuex application that requires registration (Firebase) to access additional pages with detailed information, ability to manage a table of programming languages (add, edit, delete and filter). - [See project](#)

Gifs and Stickers search engine

A Vue Composition API application that uses GIPHY to search and display gifs or stickers based on the user's location. - [See project](#)

Digital Currency Market

A Vue application that uses an API to display real-time prices for 100 virtual cryptocurrencies. - [See project](#)

Weather Forecast

A Vue Vite app that uses an API to display detailed weather based on the region entered by the user - [See project](#)

QR Code Generator

A Vue Vite Composition API application that allows the user to create and share their own QR code. - [See project](#)

Pokemon Finder

A Vue application that uses the PokéAPI to allow the user to search a list of Pokémon and display an image along with a bar graph containing their detailed information. - [See project](#)

WORK EXPERIENCES

Grido Helado y Lacteos Luz Azul - Responsible for unloading and moving the boxes from the storage place to place of destination. Guarantee the integrity of the cargo throughout the download process and collaborate with other team members to complete the task in a term certain. I demonstrate a high level of commitment and perseverance to ensure that meet customer expectations.
